## (54) IMAGE DISPLAY MEDIUM, IMAGE FORMING METHOD AND IMAGE FORMING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an image display medium which satisfies the safety and high-speed responsiveness and enables repetitive rewriting, an image forming method capable of forming an image in the image display medium and an image forming device.

SOLUTION: The image display medium 10 is constituted by sealing black particles 18 and white particles 20 in an enclosed state between a display substrate 14 comprising a dielectric and a non-display substrate 16. A printing electrode 11 first applies AC voltage to triboelectrically charge the black particles 18 and the white particles 20 and then the electrode 11 applies DC voltage between the substrates in accordance with an image. The black particles 18 sticking to the voltage applied part (non-image area) of the display substrate 14 move toward the non-display substrate 16.
